

Solano County Water Agency

Lower Putah Creek Riparian Water Availability Forecast: Mar. 1, 2012
(Projected water availability in the absence of Monticello Dam)

Average Monthly Gain(-) or Loss(+) in Cubic Feet Per Second (cfs)
(projected Average gain or loss in the reach)

Notes:

Portions of Reach 2 receive "rising ground water" during all but extreme drought conditions. Consequently, there are instances when most but not all of reach 2 is dry (lacks riparian water). The stream flow projections for Reach 2 are based on net stream flow gains and losses occurring within the reach and therefore, may underestimate riparian water availability at specific locations along Reach 2.

Key:

DD	Putah Diversion Dam
505	Interstate Highway 505 Bridge
Stev	Stevenson Road Bridge
I80	Interstate Highway I-80 Bridge
Mace	Mace Boulevard Bridge
RM 0.0	River Mile 0.0 of Putah Creek (Western most edge of Putah Creek)
