

February 1-7

Sunday, February 7, 8:00 AM. Clearing skies after morning low clouds. Showers returning Tuesday but then dry by Wed, up to 1/4 inch. Another

round of rain is possible late Thursday and into Friday before drier weather returns for the weekend. Low risk of flooding.

Saturday, February 6, 8:00 AM. Showers today through tonight, possibly heavy at times, up to 0.5 inches predicted. With watersheds already saturated from previous rains, this amount of rain could cause flooding in areas subject to flooding. In the Suisun Valley area, Lake Curry will likely begin spilling increasing the risk of flooding in the Suisun Valley. Chance of small showers Sunday AM turning to partly cloudy. Unsettled weather predicted through next week with a pattern of partly cloudy with shower activity Mon-Tue and Thu-Fri, trace to .25 inches. Rain possibly returning Friday.

Friday, February 5, 8:15 AM. Very small amounts of rain likely for today. For Saturday rain up to 1/2 is forecasted. For Sunday very small chance of rain. With watersheds already saturated from previous rains, this amount of rain could cause flooding in areas subject to flooding. In the Suisun Valley area, Lake Curry will likely begin spilling increasing the risk of flooding in the Suisun Valley. For next week, Monday through Thursday, very small amounts of rain are forecasted.

Thursday, February 4, 8:30 AM. Rain likely during the afternoon and evening hours, up to 0.9 inches. For Friday, very small amounts of rain likely. For Saturday rain up to 1/2 inch. With watersheds already saturated from previous rains, this amount of rain could cause flooding in areas subject to flooding. In the Suisun Valley area, Lake Curry will likely begin spilling increasing the risk of flooding in the Suisun Valley.

Wednesday, February 3, 8:30 AM. Very small chance of very small amounts of rain for today. Rain likely Thursday, but again with very small amounts of rain. For Friday rain up to 3/4 inch and for Saturday rain up to 1/2 inch. With watersheds already saturated from previous rains, this amount of rain could cause flooding in areas subject to flooding. In the Suisun Valley area, Lake Curry will likely begin spilling increasing the risk of flooding in the Suisun Valley.

Tuesday, February 2, 8:30 AM. Chance of very small amounts of rain for today. For Wednesday, also chance of very small amounts of rain. For Thursday rain up to 1/2 inch, Friday rain up to 3/4 inch, and Saturday rain up to 1/2 inch. Wet weather is anticipated Thursday through Saturday. With watersheds

already saturated from previous rains, this amount of rain could cause flooding in areas subject to flooding. In the Suisun Valley area, Lake Curry will likely begin spilling increasing the risk of flooding in the Suisun Valley.

Monday, February 1, 09:15 AM. Chance of very small amounts of rain for today. For Tuesday and Wednesday, very small amounts of rain are likely. For Thursday through Saturday, rain up to 3/4 inch is forecast.
