

Solano Habitat Conservation Plan

Figure 7-4
Planning and Implementation
Schedule for Biological
Effectiveness Monitoring Program
 (modified from Atkinson et al. 2004)

¹ Includes invasive species monitoring and elderberry shrub monitoring.

² Post-restoration monitoring of the 85 acres of aquatic habitat, established under Objective GGS 1.2 and Objective CM 2.2 will be conducted as part of the Restoration and Enhancement Plan of the reserve for the first 5 years.

³ Following rediscovery of a population, monitoring will be conducted every year for the first 5 years then again in years 7 and 10 prior to resuming long-term monitoring.

⁴ Nest sites preserved under Objective SH 2.2 and Objective BO 2.1 shall be monitored annually until a sufficient number of known nest sites become established on foraging habitat reserves.
